Dear Potential Municipal Partner:

Timbron International is a manufacturer of a line of recycled decorative interior molding products utilized in homes throughout the United States. Our recycled interior molding products are sold through Home Depot stores in the USA, Canada and Puerto Rico. Timbron International's decorative interior moldings contains 90% recycled Expanded Polystyrene (EPS).

Timbron International is committed to the recycling of EPS and is very interested in acquiring EPS from California municipalities. We are extremely interested in post-consumer packaging and food service EPS that is in a recyclable condition. .

We are very interested in working with local California municipalities throughout the state to establish effective recycling programs for EPS. Please feel free to contact me if you have an interest in partnering with us.

Best Regards,

David Firestone  
Director of Recycling  
Timbron International

To: Potential Municipal Partner,

My business, Natural Environmental Protection Company (NEPCO), is a company that uses “Styrofoam” to manufacture high quality picture frames at our facility in Chino, CA. Since 2006, we have increased our size from four employees to seventeen. We have also tripled the size of our building and as a result, we are currently running three manufacturing lines 24 hours, 7 days a week. Since post-consumer foam is the key ingredient for our picture frames, NEPCO is in critical need of packaging and food service foam (recyclable condition) from California municipalities and businesses. We need your foam to keep up with our growth which is creating green jobs for Californians!

We currently use both types of foam from material recovery facilities, businesses, and the public. Using recycled foam not only enables us to do our part to improve the environment but it also helps us keep our manufacturing costs down. Please contact me at the listed number above if you have an interest in recycling your foam with our company.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Tommy Kim'.

Tommy Kim
